Getting Started

Storey runs the same on the phone app and the website — same screens, same login. Use whichever is handy.

Two ways to use Storey

On your phone (App)	On a computer (Website)
Install Storey from the Google Play Store. Best for the field — attendance, daily logs, expenses, photos.	Open storeyinfra.com in any browser. Best for the office — reports, budgets, team management.

Your data is the same in both. Mark attendance on the phone at site, see the report on the website at the office — instantly.

Signing in

- 1 Open the app or website. You land on the sign-in screen.
- 2 Choose a method: **Google**, **Email & Password**, or **Phone OTP**.
- 3 First time? A contractor registers the company. Team members join with an **invite code**.

Sign-in screen

Who does what

Role	In short
Contractor	The owner. Full access — every site, money, team.
Site Manager	Runs assigned sites — workers, materials, expenses, approvals.
Site Supervisor	On-ground — attendance, daily logs, raises expenses.
Store Keeper	Materials & equipment — stock, receipts, transfers.

Tip: You only see the menu items your role needs. A cleaner screen, less confusion.

Roles at a Glance

What each role can open from the menu. ✓ = available.

Reports	✓	—	—	—
Team / Invites	✓	—	—	—
Settings	✓	✓	✓	✓

Expenses approval: A Supervisor *raises* an expense (status: Pending). A Site Manager or Contractor *approves* it. Only approved expenses count in reports.

Contractor

The company owner. Full control of every site, the team, money and reports.

Contractor dashboard

Your features

Sites

Create and manage every construction site — name, location, budget, status.

Workers

Add labour — name, trade, daily wage, direct/vendor, ID proof (last 4 digits only).

Team

Invite Site Managers, Supervisors and Store Keepers with an invite code.

Reports

The full picture — Attendance & Pay, Site Report, Materials, Budget vs Actual. All printable.

Everything the Contractor can do

Feature	What it's for
Sites	Set up sites, budgets, mark active/completed.
Workers	Onboard labour with wages, trade and vendor details.
Attendance	Mark Present / Absent / Half-day / Paid-leave daily.
Daily Logs	Record site progress, weather, issues.
Inventory · Receipts · Transfers	Track material stock, incoming goods, inter-site movement.
Equipment	Register machines and assets, assignments, maintenance.
Expenses	Record and approve cash spends — fuel, transport, rentals.
Reports	Payroll, site spend, budget variance — printable / PDF.
Team	Invite and manage all staff roles.

Site Manager

Runs the sites assigned to them — day-to-day workers, materials, equipment, and approving expenses.

Approving expenses

Your features

My Sites

Only the sites assigned to you — focused, no clutter.

Workers & Attendance

Onboard labour and mark daily attendance.

Materials

Inventory, receipts, transfers, equipment for your sites.

Approve Expenses **KEY**

Review what supervisors raised — Approve or Reject.

How to approve a Supervisor's expense

- 1 Open **Expenses** from the menu.
- 2 Set the Status filter to **Pending** — these need your decision.
- 3 Check the amount, category and note.
- 4 Tap **Approve** (counts in reports) or **Reject**.

Note: A Site Manager sees only assigned sites — not the whole company. For the company-wide view, that's the Contractor's Reports.

Site Supervisor

On the ground every day. Marks attendance, writes the daily log, and raises expenses for approval.

Marking attendance

Your features

Attendance **DAILY**

Tap each worker to cycle Present → Absent → Half-day → Paid-leave.

Daily Logs

Record what happened — work done, weather, issues, worker count.

Workers

View and add workers on your site.

Raise Expenses

Log a cash spend — it goes to your Site Manager as **Pending**.

The daily routine

- 1 Morning:** open Attendance, mark every worker, Save.
- 2 During the day:** raise any expense (diesel, tea, transport) as it happens.
- 3 Evening:** open Daily Logs, write what was done and any issues.

Status legend: **P** Present **A** Absent **1/2** Half-day **PL** Paid leave

Store Keeper

Owens the materials. Records what comes in, what moves between sites, and keeps stock accurate.

Inventory stock

Your features

Inventory

Live stock of every material, per site, with reorder levels.

Material Receipts

Record incoming goods (GRN) — quantity, supplier, cost.

Material Transfers

Move stock between sites — both sides stay in sync.

Equipment & Assets

Track machines, assignments and maintenance.

Recording a material receipt

- 1 Open **Receipts** → tap **Record receipt**.
- 2 Pick the site and material, enter quantity, supplier and unit cost.
- 3 Save — inventory updates automatically.

Why cost matters: the unit cost you enter flows into the Contractor's Budget vs Actual report. Accurate entry = accurate budgets.

Reports & Printing

For the Contractor. Every report has a Print button — print on paper or save as PDF, on phone or computer.

Report	Shows
Overview	All sites with budgets and status at a glance.
Attendance & Pay	Worker × date grid with auto-calculated wages for any date range.
Site Report	One site, full picture — daily logs, attendance, materials, expenses, total spend.
Materials	Material received vs transferred, monthly, with cost.
Budget vs Actual	Planned vs spent per material, with variance.

Attendance & Pay report

How wages are calculated

Status	Counts as
Present	1 full day
Half-day	½ day
Paid leave	1 full day
Absent	0

Pay = total days × the worker's daily wage. Vendor labour is grouped under the vendor.

To print: open any report → tap **Print** → choose a printer, or "Save as PDF" to share on WhatsApp / email.

Good Habits & Support

For a smooth site

- **Mark attendance every morning** — it's the base for payroll and daily logs.
- **Raise expenses the moment cash is spent** — don't wait till evening, things get missed.
- **Site Managers: clear pending expenses daily** — keeps reports accurate.
- **Store Keepers: record receipts the same day goods arrive** — stock stays trustworthy.
- **Contractors: review the Site Report weekly** — catch overspend early.

Privacy & safety

- Only the last 4 digits of a worker's ID are stored — never the full number.
- Each company's data is fully separate — no one outside your company can see it.
- Sign out on shared devices: Settings → Sign out.

Need help?

On the sign-in screen, tap **"Need help signing in?"** to message support. Or write any time to:
