

Verification Checklist — 2026-05-18 Build

Purpose: verify the work shipped on 2026-05-18 before relying on it or building anything new (TODO item P0). Walk each test on `storeyinfra.com`, tick the box, note anything that breaks.

Build: offline mode · on-site photos · Task/Work-Assignment module · 4-stage material-transfer redesign · attendance & daily-log confirmation layer · spinner fixes · password-reset fixes.

Part 1 — Backend & deployment verified 2026-05-18

Check	Result
Web app live (<code>storeyinfra.com</code>)	 HTTP 200
Edge functions responding	 HTTP 200
All migrations applied to live DB (<code>009</code> ... <code>20260518170000</code>)	
New tables <code>tasks</code> , <code>task_updates</code> exist	
<code>attendance</code> / <code>daily_logs</code> / <code>material_transfers</code> columns applied	
<code>site-photos</code> storage bucket migration applied	

The plumbing is confirmed. Part 2 below is the user-facing walk-through.

Part 2 — Manual UI tests (walk these on `storeyinfra.com`)

Mark each:  pass ·  fail (note what happened) ·  skipped

T1 — Tasks: cascade assignment

- ☐ Contractor creates a task, assigns it to a Site Manager
- ☐ Site Manager opens it, adds a sub-task, assigns to a Supervisor
- ☐ Supervisor opens the sub-task, adds a sub-task assigned to a Worker
- ☐ **Expected:** the assignee dropdown shows only the next role down each time
- Result: _____ Notes: _____

T2 — Tasks: daily update + status

- ☐ On a task, log a daily update with a note + photo
- ☐ Move it Pending → In progress → Submitted

- ☐ As the assigner, Confirm it → status becomes Done
- ☐ Try "Send back" on a Submitted task → returns to In progress
- ☐ **Expected:** overdue tasks show a red "N days late" badge
- Result: _____ Notes: _____

T3 — Material transfer: 4 stages

- ☐ Store Keeper / Site Manager initiates a transfer (from/to site, material, qty)
- ☐ Supervisor of the from-site sees it on their dashboard → confirms dispatch (vehicle/challan) → **from-site stock drops**
- ☐ Store Keeper / Site Manager approves it
- ☐ Receiving site accepts with quantity → **to-site stock rises**
- ☐ **Expected:** the transfer's Activity log shows who did each stage + when
- Result: _____ Notes: _____

T4 — Attendance confirmation

- ☐ Supervisor marks attendance for a site+date → shows "pending confirmation"
- ☐ Site Manager opens the same day → "Confirm Day" → shows ✓ Confirmed
- ☐ Reports → Attendance: an unconfirmed day shows the amber "pending" banner
- Result: _____ Notes: _____

T5 — Daily log confirmation

- ☐ Supervisor files a daily log → badge shows "Pending"
- ☐ Site Manager confirms it → badge shows "Confirmed"
- ☐ Edit a confirmed log → it returns to "Pending"
- Result: _____ Notes: _____

T6 — On-site photos

- ☐ Add a photo on a daily log / expense / receipt / worker
- ☐ **Expected:** camera opens (not gallery first) on a phone
- ☐ The saved photo shows a date-time stamp burned into the corner
- ☐ Tap a photo thumbnail → it opens full-size; tap again / ✕ to close
- Result: _____ Notes: _____

T7 — Offline mode

- ☐ Turn off the network (airplane mode)
- ☐ Mark attendance / file a daily log / add an expense
- ☐ **Expected:** an offline banner appears; the entry saves locally
- ☐ Turn the network back on
- ☐ **Expected:** the banner shows syncing, then the data appears server-side

- Result: _____ Notes: _____

T8 — Loading spinner

- ☐ Use the app normally for a while, switch browser tabs and back
- ☐ **Expected:** no endless "Loading Storey..." spinner; no full-screen blank-out when a token refresh happens in the background
- Result: _____ Notes: _____

T9 — Password reset

- ☐ Login page → Forgot password → enter email
- ☐ **Expected:** "check your email (incl. spam)" message
- ☐ Email arrives from `noreply@storeyinfra.com`
- ☐ The link opens the **Set new password** page (not login/dashboard)
- ☐ Set a new password → lands in the dashboard
- Result: _____ Notes: _____

T10 — Dashboards

- ☐ Supervisor dashboard shows "transfers awaiting your dispatch" when relevant
- ☐ Site Manager dashboard shows the "Needs your confirmation" panel
- Result: _____ Notes: _____

Sign-off

- Tested by: **Karun (owner)**
- Date: **2026-05-19**
- Overall: ☒ **build verified** — v1.1.1 (versionCode 15) cleared for upload to Play Console closed testing. Any issues found from here on are tagged into `docs/TODO.md` as they surface.
